SUMMARY

I am a Cornell Master of Engineering candidate specializing in Product Management and Entrepreneurship with 4.5 years of experience in product-adjacent roles at Freshworks, where I led cross-functional teams, collaborated on 15+ feature launches, and drove process improvements that accelerated customer issue resolution by 40%. My background combines hands-on technical expertise in automation and testing with a strong foundation in product strategy, requirements gathering, and data-driven decision-making. I'm eager to bring this blend of analytical rigor and execution focus to a PM or APM role where I can drive product success from day one.

PROFESSIONAL EXPERIENCE

Freshworks Inc.

Senior Software Engineer – Test

Apr 2024 – May 2025

Bengaluru, Karnataka, India

- Led 9-member cross-functional team to deliver Contextual Collaboration and DevOps Change Management features, improving collaboration across 200+ enterprise users and demonstrating product leadership, stakeholder management, and execution capabilities
- Collaborated with product managers on 15+ feature launches, aligning quality assurance strategy with product success metrics, roadmap tradeoffs, and sprint planning to enhance user experience and drive adoption
- Accelerated customer issue resolution by 40% through process improvement and cross-functional coordination between product, engineering, and support teams, showing operational excellence and customer-centric thinking

Freshworks Inc.

Software Engineer – Test

Oct 2020 – Mar 2024

Bengaluru, Karnataka, India

- Reduced regression test time by 85% (3 days to 4 hours) through automation framework design, improving release efficiency
- Improved accessibility and usability by resolving 50+ WCAG compliance issues during Ticket Page Revamp
- Designed and maintained automated test workflows using Selenium, Python, and Jenkins

Cornell University

Grader — Product Management (ENMGT 5920)

Jan 2026 – Present

Ithaca, NY

- Evaluate case study analyses, weekly discussions, and sprint deliverables covering A/B testing, customer journey mapping, sentiment analysis, and product roadmaps

Cornell University

Grader — Project Management (CEE/ENMGT 5900)

Jan 2026 – Present

Ithaca, NY

- Evaluate assignments and exams on WBS, CPM, GANTT charts, earned value management, and resource leveling
- Assess team projects on project leadership skills including emotional intelligence, stakeholder management, conflict resolution, and team dynamics

EDUCATION

Cornell University

Master of Engineering in Engineering Management

GPA: 3.96/4.0 | Specialization: Entrepreneurship and Product Management

Aug 2025 – Dec 2026

Ithaca, NY

SRM Institute of Science and Technology

Bachelor of Technology in Computer Science and Engineering

GPA: 3.90/4.0

June 2016 – May 2020

Kattankulathur, Tamil Nadu, India

PROJECTS

Agentic AI Healthcare Agent

Cornell Johnson Graduate School of Management — Digital Technology Immersion (DTI), Client: Oracle

Jan 2026 – May 2026 (expected)

- Leading AI technical implementation of an agentic AI system for Oracle, designing agentic building blocks, tool specifications, and knowledge base architecture
- Working directly with Oracle's Senior Principal Engineer in Agentic AI as technical mentor throughout the project lifecycle

Automated Job Application Pipeline

Personal Project

Jan 2026 – Present

- Built end-to-end job search automation: multi-source discovery (Simplify, Jobright, LinkedIn, Greenhouse), rule-based scoring engine with pre-filters, and auto-triage to Notion
- Engineered Claude-powered packet generation with hallucination guardrails — outputs tailored cover letters, resume bullets, company briefings, and outreach messages from a candidate knowledge base

WorkBuddy AI – Productivity Assistant for Remote Teams

Sept 2024 – May 2025

Indian School of Business — Product Management Certification Capstone

- Proposed AI-driven SaaS product improving remote-team productivity through task insights and collaboration prompts
- Conducted customer interviews, mapped personas, and tested a Figma prototype to validate core features
